

How to resolve Windows 10 Activation Error 0x803fa067

Have the network adapter up and ready to disable before doing the steps below

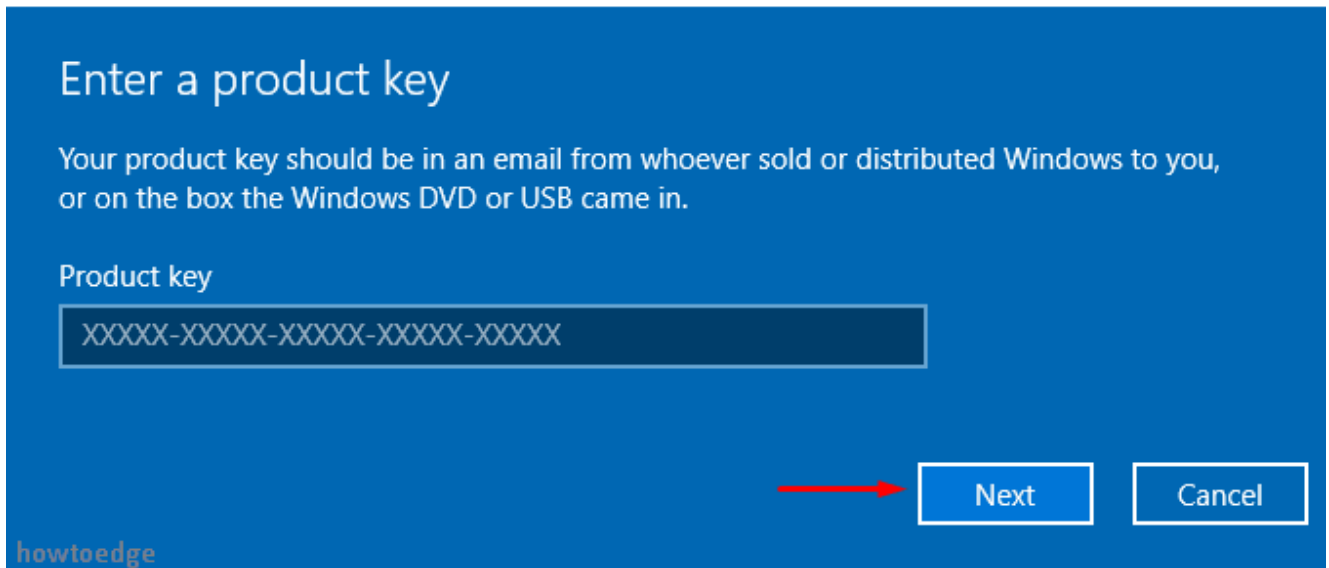

1. Press Win + I together to open the Settings window.
2. Select the Update & Security icon.
3. In the left pane, select the Activation option.
4. Go to the Update product key section and open the link Change product key.

5. On the following result, type the 25-digit (default key from Microsoft) product key:

VK7JG-NPHTM-C97JM-9MPGT-3V66T

6. Click the Next button to complete the process.

7. Once you get to the Start button stop and now disable the network adapter giving internet.
8. THIS WILL ERROR DO NOT WORRY

STAY OFFLINE DO NOT CONENCT INTERNET

CLOSE THE ERROR AND RESTART

this should queue a local offline update let that run

9. Once PC is back up turn back on the network adapter then enter the intended to use key.
